Figma Adobe Sketch

How is the cost of services calculated

We work by a **Time & Materials** model

Specialists **log their working time**, full-time specialists work on average **21 days** a month, or **168 working hours**

We issue an invoice based on aggregated work report to you **every month**, that should be paid in **7 calendar days**

For Project Management, we charge **10%** of the total effort, and **25%** of the technical effort for Quality Assurance

Clutch reviews

Stephen Bell, HiVRs

Business processes automation platfrom

Pplatform hasn't been launched yet, company stakeholders are happy with the performance. TechWings works efficiently, and their output needs little rework.

Travis Stevens, Orpyx

Innovative medical wearables provider

We are happy with TechWings work, praising their ability to communicate promptly and stay goal-oriented even as the startup changes directions.

Faizan Ali Khan, LetHub

AI-powered leasing automation software

TechWings provides high-quality development services with incredible project management skills. Their team is creative, attentive, and responsive.

Karol Jasik, Modento

Dental clinics automation system

TechWings was able to deliver the project successfully. Team managed to meet all the requirements and expectations. They conducted regular meetings.

Erin Driggers, SpliceMachine

Machine learning automation platform

Although the product has yet to be released, stakeholders are satisfied and excited about the prospect of launching the newly designed app by TechWings.

Jake Robinson, Superdraft

Modern architectural design company

Product now at the user-testing stage, stakeholders are happy with its progress. TechWings has met all expectations, delivering solid workflow.
